Education Catalogue

Edition One

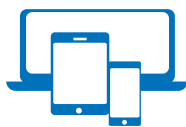

We have been working with schools and education organisations for the past 20 years. From the top of the Kimberly to the South West and Goldfields, we work alongside over 400 schools, both in the private and public sectors, and are one of the largest suppliers of Network Integration Services to the Education sector.

From the beginning we have been on the WA Department of Education's panel for integration services and are a partner for CEWA's LEADing Lights project.

We provide local support across three offices in Perth, Bunbury and Albany, covering all of WA including support to remote communities.

What we do...

Comprehensive end-to-end solutions and services for K - 12

Mobility Solutions

Manage technology efficiently with Mobile Device Management (MDM). Secure your devices whilst managing applications, updates, patches, data and settings.

Infrastructure and Wireless

We ensure that the technology you have in place is secure, reliable and optimised for performance.

Managed Support

Comprehensive IT support from proactive monitoring and alerting to remote and onsite support.

Cloud Services

Modernise your organisation with a range of secure, reliable and cost friendly cloud based solutions that enhance and empower your environment.

Procurement

As a specialist Education seller and BYOD provider, your school gets the best pricing and service.

Repairs

One stop shop for all your Apple, Microsoft and Lenovo warranty and insurance repairs.

Welcome to our Education Catalogue for 2018

It has been a busy first six months for 2018; our business continues to grow and our range of offerings continues to expand.

Over the past six months our professional services team have been busy rolling out some 10,000 devices via MDM, our cloud services team continue to implement and develop solutions and service offerings around Office365 and Azure, while our managed support desk has implemented new tools and technologies to improve our proactive monitoring and support services.

During this period we also launched into the market 'ClassVR', a Virtual, Augmented and Mixed Reality solution built for education.

I would like to take this opportunity to say a massive thank you to the attendees of our inaugural WA Education Summit, held at Optus Stadium in which we received fantastic feedback, and also all those who visited our ClassVR stand at EduTECH.

As we lead into the planning and procurement period for 2019 this catalogue will provide an overview of some of the range of education-focused solutions and services that we offer. With over 20 years of servicing the education market, we are well placed to advise you on all things ICT.

Our dedicated and enthusiastic team look forward to working with you and your school to ensure that you are getting the best solutions and services to further enhance and empower your teaching and learning environments.

Justin Cantrill
CEO

Lenovo. Better for learning from every angle.

Lenovo 300e

Multi-mode Capability for Multiple Study Style

Teaching and studying demand various modes and this notebook enables just that. Its multiple modes – laptop, tablet, tent and stand – make it perfect for students and teachers alike.

Thinkpad 11e

Enhanced Creativity, Uninterrupted Collaboration

The Thinkpad 11e has specifically been engineered for students and teachers alike. Available in notebook or Yoga models.

Miix 520

Powerful and versatile

The Miix 520 is as flexible as you are. Feeling creative? Grab your Lenovo Active Pen and write or draw on screen. Need to chill? Detach the keyboard for a multimedia-rich tablet with stunning 12" display and crisp sound.

For quotes on any Lenovo devices, talk to us today
08 6241 2550 or sales@solutionsit.com.au

Windows Autopilot

Windows Autopilot¹ revolutionizes the way new devices get deployed, reset and repurposed, with an experience that is zero-touch for IT. Your users will love it.

Out of the box and ready to go

Unbox your new Windows device and turn it on. Windows Autopilot configures it from the cloud—with a few simple clicks, the device becomes business-ready

Provisioning minus the hassle

Deliver a better user experience with personalisation and fewer steps to set up.

Keep track of the whole process

With Windows Autopilot, users can see how configuration is progressing.

Move to the cloud at your own pace

Windows Autopilot can join devices to Azure Active Directory and enrol them in mobile device management. Coming soon: join devices to the Active Directory.²

¹ Requires Azure Active Directory Premium for automatic MDM enrollment and custom company branding. Requires Intune for enrolment status page. Sold separately.

² Requires support from Microsoft Intune or other MDM vendors. Requires Microsoft Intune for remote reset. Sold separately.

To find out more about Windows Autopilot, talk to us today

Introducing Surface Go.

A device as versatile as your students.

Surface Go has the flexibility to spark creativity in every lesson and learner.

Right sized for students

At 10" and just 520 grams, Surface Go's slim lightweight form leaves plenty of room in the backpack for school gear. And with up to 9 hours of battery life it powers through the school day without interruption.

Ready for anywhere, any time learning

Surface Go combines Wi-Fi with optional 4G connectivity, bringing students the flexibility of connected learning.

Manage a class set with ease

It's easy to set up and manage a class set of Surface Go devices with Windows® AutoPilot. Introduce the power of Office 365® Education and ensure password-free, enterprise -grade security with Windows Hello® face sign-in.

All the right connections

Connecting to external equipment for STEM? Need to study quietly with headphones? Surface Go includes a USB-C for flexibility, Surface Connect for fast charging and docking, a MicroSD Card Reader for additional memory, and a headphone jack.

With up to 8GB RAM, Surface Go is packed with performance, enabling students to work on several things at once or tackle demanding projects. There's no compromise on performance with a powerful Intel® Pentium® Gold Processor 4415Y that's ready for multitasking and coding tasks.

Microsoft

The advantages of Intune for Education

Intune for Education offers education IT pros a simple and modern way to manage school technology from the cloud. Deploying Intune for Education as part of the Microsoft 365 Education platform offers numerous features tailored to fit the specific needs of schools and classrooms.

Deployment >

- Deploy and manage Windows 10 devices simply
- Enroll devices into Azure AD and Intune with just a USB and the Set up School PCs app
- Choose from 150+ settings to keep school data safe and students on track
- Move from on-premises System Center Configuration Manager to the cloud with Intune in strategic, manageable portions with **co-management**

Applications >

- Manage a range of powerful apps
- Download and deploy web, Win32 desktop, and **Microsoft Store for Education** apps
- Pre-Install and block apps

Devices and Operating Systems >

- Administer BYOD, 1:1, and shared devices with device and application management
- Manage multiple operating systems including Windows 10, iOS, Android, and macOS X using the full enterprise-grade Intune console

Identity and Security >

- Protect school data with Azure AD
- Sync and manage class rosters and identities with **SDS and Azure AD**
- Comply with local and global regulations on storing student data

Discover additional features with your plan

*Compare generally available **Azure Active Directory (Azure AD)** features that come with Intune for Education, and Microsoft 365 Education plans.

Intune for Education (Azure AD EDU)

Microsoft 365 A3 and A5 (Azure AD Premium)

-  **Basic features**
-  **Premium features**
-  **Advanced Security**

<ul style="list-style-type: none"> • Azure AD Basic • Single Sign-On • Enterprise State Roaming for Windows 10 with Azure AD join • Administrative Units 		
<ul style="list-style-type: none"> • MDM auto-enrollment • Dynamic Groups • Self-Service Password Reset with write-back, Bitlocker recovery • Additional local admins 		
<ul style="list-style-type: none"> • Advanced Usage Reporting • Multi-Factor Authentication • Conditional Access • Identity Protection • Privileged Identity Management 		

Kearnan College is a Catholic co-educational school situated in Manjimup, WA that provides primary education for local children and secondary education for students from several South West WA towns.

The school had experimented and invested in several devices and by the end of 2017, had a mix of PCs, Chromebooks, iPads and iMacs. Having a range of devices was proving to be difficult to utilise in the classroom and manage across the school.

Jason Meynell was appointed as Principal in 2017 and wanted to bring some device uniformity to the school. The school considered the financial implications of doing this and had initially contemplated a BYOD program. After much thought and consultation, the school decided to look for a low-cost device that could be rolled out across the school and replace most devices, “we wanted to ensure that all the children had the opportunity to develop equally” says Jason.

Solutions IT was invited to consult on which device would be appropriate for the school's needs. Understanding the school's educational requirements and budget, Solutions IT recommended the Lenovo N24 which was touch enabled and came complete with a pen. At the end of 2017 Solutions IT rolled out the 300 Windows 10 Lenovo devices for the College.

There was a requirement that the devices were to be rolled out with minimal effort and were to be fully provisioned for staff and student use. During the project the 'Setup School PCs' app and 'Windows Configuration Designer' was used to create customised provisioning packages to configure the devices for the school network. This included wireless settings, device naming, domain membership and the deployment applications including Office 2016.

“We have seen a huge transformation in how we teach since we committed to using these devices” say Jason. The pen has given another dimension to the classroom, “it is simply fantastic, we love how this enables new and different ways to learn and can see great benefits already. The devices themselves are robust and came with everything that the students need. The devices have expanded the classroom horizon and form part of the ‘employment landscape’. The teaching staff are all on board and are already accessing O365 to take advantage of the collaboration spaces. Our Year 9 students are mentoring some of the primary school students from other towns. The next phase is a project to create a community newspaper with the primary schools that we are affiliated with”. Many of these students will feed into Kearnan College, so this is a great introduction to the school.

Due to the success, the school is about to roll out another 60 devices, “Our students and teachers have embraced this technology. We have a strong sense of direction now and the possibilities for teaching and learning are endless”.

Our Buyback Program

The Solutions IT Technology Buyback Program is a must for Schools who want to maximize their IT return on investment and be part of global, sustainability, environmental program. This is a fast and simple processes that offers competitive market leading valuations and complete data integrity.

Benefits of our Technology Buyback program:

- ✓ You can now enjoy the benefit of a fast, simple and effective Trade-In solution. Our buyback program ensures minimal disruption to our clients, with maximum returns.
- ✓ We provide a very competitive market leading valuation for your fleet of unwanted devices – with the agreed Trade-In credit to be paid to a nominated bank account via EFT.
- ✓ De-risk your critical information – you will have complete assurance all devices traded in are data wiped to factory settings, with data destruction certificates available upon request.
- ✓ 98% of all equipment received are refurbished and re-purposed both here in Australia and in developing nations. 2% of equipment recycled back into usable materials, keeping harmful waste out of landfill.

Device as a Service (DaaS) combines hardware, software, services, lifecycle management and financing into one all-encompassing solution enabling a single, predictable price per user per month. As the world moves towards an 'X as a Service' model, Device as a Service is set to revolutionise the way organisations purchase, manage and maintain hardware.

Device as a Service provides the following benefits

- Predictable budget planning
- Ability to scale up and down with enrolments
- Keep your end users up to date with the most relevant technology
- Reduce time and resource costs
- Reduce IT overhead and management
- Flexible financing options
- Technology tailored to how end-users work

THE FORTINET SECURITY FABRIC

THIRD-GENERATION NETWORK SECURITY

First-generation network security, known as stateful firewalls, focused on securing the connection. Led by Fortinet, a second generation of network security, next-generation firewalls and UTMs, expanded inspection to the application and content. Today, the emergence of cloud, IoT and mobile is driving the need for a third generation of network security to protect the rapidly expanding attack surface and secure “data everywhere.”

Fortinet is once again leading the way with its Security Fabric, the first architectural approach to security designed to dynamically adapt to the evolving IT infrastructure. The Security Fabric intelligently segments the network, from IoT to the cloud, to provide broad, powerful and automated protection against sophisticated threats.

BROAD

The Fabric covers the entire attack surface — security can be applied to the network, endpoints, access, applications and cloud, and visibility extended to other vendor solutions.

POWERFUL

The Security Fabric utilizes security processors to reduce the burden on infrastructure, allowing comprehensive security without affecting performance.

AUTOMATED

The Security Fabric enables a fast and coordinated response to threats — all elements can rapidly exchange threat intelligence and coordinate actions.

Solutions IT prides itself on delivering excellent service and support to hundreds of educational organisations across Western Australia. We offer a range of support and managed solutions customised to your needs. Discuss your unique support requirements with us today!

Need help with projects

With over 20 years experience Solutions IT can help you with;

- ✓ Deployment and configuration
- ✓ Rollouts and upgrades
- ✓ Network and Wireless upgrades and configuration
- ✓ Virtualisation
- ✓ Onsite warranty and repairs
- ✓ Device Management
- ✓ SOE Design and Deployment

"We aim to give our students the best educational experience possible and ensure we support our teachers in the process. Much of this is assisted by ICT and, without the expertise, efficiency and support from Solutions IT, this couldn't be possible. We would highly recommend Solutions IT to other schools seeking to engage and enhance learning for students, teachers and parents alike"
St Matthews School

Customised support for your school

Solutions IT offers a range of customised support solutions tailored to your requirements.

OnDemand

OnDemand support is a pay as you go service that can be used for both onsite and remote support.

Pre Paid / Scheduled Support

Provides schools with fixed price reduced rates that can be used on an as needs basis or for scheduled onsite visits tailored to your requirements.

Helpdesk

Our helpdesk provides phone, email and remote support enabling issues to be resolved and your queries answered in a more efficient and timely manner.

Outsourcing

Providing permanent or part time staff to complement existing support needs or to cover staff who are on leave or long service.

Remote Monitoring and Management

Provides proactive monitoring, alerting and management of your environment minimising disruption and allowing you to focus on your core business.

Fixed Price Support

Looking for peace of mind? Talk to us today about our fixed price support agreements that make budgeting and expenses more manageable.

Our support and service solutions offer many benefits such as;

- ✓ Fast turn around times
- ✓ Access to wide range of certified staff
- ✓ Reduced rates and fixed pricing
- ✓ Proactive monitoring and management
- ✓ Allows you to focus on your core business
- ✓ Complement and extend your existing team
- ✓ Scale up and down based on your needs
- ✓ 20 years of supporting educational organisations across WA

08 6241 2550 or sales@solutionsit.com.au

"The 'Managed Services' package provided by Solutions IT has been a perfect fit for our school. What it means for us is we get the daily support and service we need – on site. Their staff are part of our team here. We don't need to worry about professional development, staff management or attend panel/industry meetings to keep us informed. Solutions IT know the education sector so well and provide a superior service as a result."

Safety Bay Senior High School

"Being located in a remote area, it is not always easy to find a reputable, experienced and reliable IT company that can also travel to our location. We have found Solutions IT's services provide just that. Our schools ICT infrastructure are maintained by their remote service and backed up with regular visits. They provide recommendations and are proactive in their approach. This has been invaluable. What this means for us is we have consistency of service, qualified staff looking after us and the backing of the entire company should we ever need it."

Ngaanyatjarra Lands School

Great Southern Grammar are a long-standing customer of Solutions IT and recently implemented an initiative to become a Microsoft Surface School by 2020.

"As part of our initiative there was a rigorous consultative process with Solutions IT to ensure the device met all our needs. We were able to access value adds such as Solutions IT Learning Tools Training. Solutions IT and Microsoft were also a great help in providing support and assistance around implementation", explains Kieran Bailey, Head of IT Services.

"We are particularly impressed with the support model around warranty. Having that managed by Solutions IT has ensured quick turnaround times which means that devices are back in the hands of our students swiftly."

"We regularly meet to discuss the evolving needs of the school, to gain updates to devices and ed-tech landscape. I have definitely found the relationship to be positive for one for GSG and wouldn't hesitate to recommend them to another school".

Great Southern Grammar

"We aim to give our students the best educational experience possible and ensure we support our teachers in the process. Much of this is assisted by ICT and, without the expertise, efficiency and support from Solutions IT, this couldn't be possible. It is imperative that technology enhances and enables learning, whilst operating smoothly and seamlessly.

Our relationship with our technician is fantastic; we are incredibly impressed with his professionalism, work ethic and skill set. The continuing support we receive from them and the wider team at Solutions IT is second to none. We would highly recommend Solutions IT to other schools seeking to engage and enhance learning for students, teachers and parents alike."

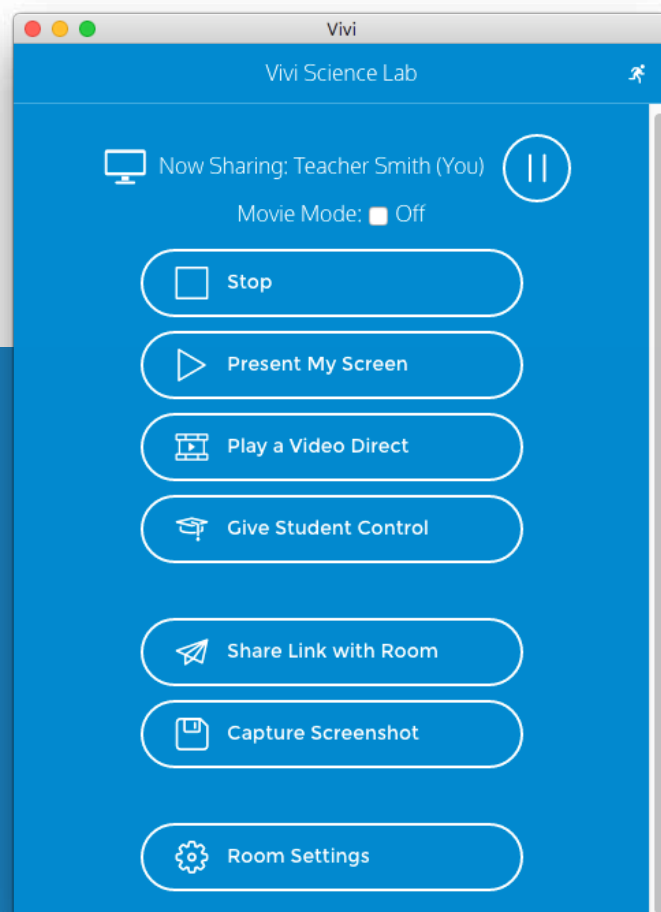

St Matthew's School

A Robust and Reliable Classroom Technology Solution

No teacher can deliver on the full potential of the 21st Century Classroom if the technology they're using is unreliable. But that's a real risk, as more technology – screen mirroring, streaming video and audio, online teaching resources, myriad student devices – enters the classroom.

Vivi answers this challenge by integrating its core functionality of screen mirroring and video streaming with a raft of additional educational features, all controlled from a single, easy-to-use app, and managed at the institutional level via a web-based Admin Portal.

Vivi was designed specifically for schools, with functionality that ensures consistent, reliable performance, so that teachers and students aren't distracted from whatever task is at hand.

- True cross-platform compatibility
- Simple, easy-to-use app for teachers and students
- Seamless video performance
- Protection against unauthorised access
- School-wide management and monitoring
- Analytics Dashboard
- Digital Signage
- Constant improvement to functionality and performance

Engage Every student

Identity Management (IdM) is the process of managing information about a user from initiation to termination across a number of platforms, in a simple and cost-effective way. Such information includes detail that authenticates the identity of a user, and information that describes information and actions they are authorised to access and/or perform across multiple platforms. IdM workflows can influence all activities of a user and can propagate name changes, security levels and ultimately the user's digital identity.

The Challenge

Like most schools, St Mark's Anglican School works with a large number of systems and prior to IdM, tasks such as multiple account creations, provisioning of home directories and email set up, account termination were a manual exercise, per user. Each system then had to be manually updated if there was a change to a user's details or security level. This was cumbersome, and a drain on the school's ICT Team so they looked to Solutions IT to simplify the process to create a cost-effective solution.

The Solution

As part of the IdM project, Solutions IT designed and built a business rules driven solution that allowed St Mark's to automate processes that control a user's identity. The solution leveraged Microsoft's identity management server (MIM 2016), a platform that allowed the school to control a user's profile across multiple systems from a central area.

The Results & Benefits

Not only has IdM been beneficial to manage staff and student users, but the school can also manage their parent portal using part of the MIM offering. Parent users can reset their passwords easily using a self-service automated process created by Solutions IT. Parents simply click on a link when they forget their password and an email will automatically be sent to them to allow the parent to reset their password. There is no impact on the ICT team.

"Solutions IT were great to work with in configuring the system and working with us to achieve our desired outcomes"

Mark Dodd, IT Manager, St Mark's Anglican

WA Education Summit

On 24th May Solutions IT presented the WA Education Summit 2018 at Optus Stadium, the first WA based summit of its kind that brought together thought leaders in the education space sharing their insights and experience for 21st century learning.

With EdTech royalty such as Trent Ray (Education Collective), Jason Byway (Microsoft), Tamara Sullivan (Ormiston College) and representatives from Melbourne Girls Grammar sharing their feedback on their ground-breaking student regulated schooling, this event was not to be missed. Having our name lit up at the stadium was priceless! If you didn't make it, 100% of delegates who were surveyed want another event next year, so watch this space!

WA Education Summit

Delegates were engaged, enlightened, informed and often entertained by the array of speakers at WAES!

WA Education Summit

Our sponsors were kept very busy throughout the day.

In Other News...

EduTECH Event

EduTECH is an annual event where the entire education and training sector gather together to learn, debate, exchange ideas and be inspired by the very latest in education thought leadership. This year, we exhibited with ClassVR and the response to this virtual reality solution was incredible!

Solutions IT Tech Updates

From hands-on workshops to inspiring presentations, we host regular technology update events for the WA education community. To find out what's new and working well for schools, pop along to one of our events near you. More information can be found on our site.

KIDS ARE TOUGH. WE'RE TOUGHER

“WE HAVE VERY FEW DEVICE REPAIRS ON AN ANNUAL BASIS. STM GOODS HAVE SAVED US THOUSANDS OF DOLLARS IN DAMAGE COSTS”

- MICHAEL PHILLIPS, RINGWOOD SECONDARY COLLEGE (VIC, AUSTRALIA)

DUX FOR IPAD 5TH GEN

Exceeds Military-Spec drop tests, reinforced corners, magnetic closure design, folds perfectly for both viewing and typing modes.

HYNT FOR 13 & 15 INCH MACBOOK PRO (2016)

Two transparent materials (polycarbonate, TPU) provide maximum protection while allowing the beauty of your device to shine through.

Find the right solution for managing your mobile devices

Introducing the new Revolution Carts.

Designed with the teacher in mind, the Revolution Carts tick all the boxes. They retain an open design to enable passive ventilation and quick and easy visual checks, it's much smaller in size and is lighter than the previous generation. Charge, store, secure and transport Chromebooks or Laptops.¹

Revolution 16 Cart

Revolution 32 Cart

- ECO Safe Charge** power management system with remote for safe and efficient charging of devices.
- External LED indicators.** Easily and quickly see if your devices are charging and the charging mode selected.
- Timed charging modes.** Easily set your Cart to charge for a specific amount of time.
- Safe and secure.** The locking system will ensure your Cart and devices are locked down and secured.

Introducing the Putnam Charging Stations.

Designed to charge, store and secure 8 or 16 iPad Devices. The Putnam Charging Station features colour coded LED displays so you know when your devices are charged.¹

Putnam 16 Charging Station

Putnam 8 Charging Station

- External Charging Status Display.** With a colour-coded LED charging status display for each slot, easily know if your devices are charging (red) or ready to use (green).
- Pre-Wired.** Equipped with 8 or 16 MFi approved Lightning cables, the Putnam Charging Stations come with everything you need to lock and charge your devices.
- Secure.** Fully welded steel construction and a built in mechanical combination lock makes this charging station ultra-secure.
- Small footprint and lightweight.** Easily mount the compact unit to the floor, wall or a desk to save even more space.
- Efficient charging.** With 2.4 amp charging at each port, the Putnam Charging Station can charge 8 or 16 iPads simultaneously.

Introducing the Carrier Range of Charging Stations.

Designed to be universal, the Carrier Charging Stations can charge, store and secure 10 or 15 Chromebooks, Tablets, Laptops, iPads or just about any other device.¹

Carrier 15 Charging Station

Carrier 10 Charging Station

- Secure.** Keep your valuable device investments safe. The combination of welded steel construction, the mounting-kit and a hardened steel padlock, protects your devices.
- Compatible.** Each Carrier Charging Station comes equipped with a device storage rack and three Large Baskets for storing just about any device.¹
- Efficient charging.** The Carrier Charging Stations can charge 10 or 15 devices simultaneously including Chromebooks, Laptops, iPads and most Tablets, with or without most cases.¹
- Wall or desk mounting.** Transform any wall, desk or bench into a secure charging space. The Carrier Charging Stations are designed to be flexible and adapt to your surroundings.

For secure charging and storage solutions contact Solutions IT on 08 6241 2550 or sales@solutionsit.com.au

CLASSVR®

**THE WORLD'S FIRST VR EXPERIENCE
THAT GIVES YOU EVERYTHING YOU
NEED FOR THE CLASSROOM!**

Fully Integrated VR Headsets – no need for a mobile device

ClassVR's headset is an all-in-one, classroom-ready device, delivering a fully immersive VR experience under the teacher's control. It has a built-in 5.5" full HD screen, an 8MP front facing camera, integrated Wi-Fi and a battery to last throughout the school day.

Classroom Controls

The ClassVR portal is a simple way to discover and deliver engaging VR content and lessons. Providing full control and management of multiple headsets in the classroom from a simple web page, the ClassVR portal makes classroom-based VR a reality.

Secure Charging & Storage

A Classroom Set of eight headsets come complete with a toughened storage case to keep them charged and safe when they are not in use. The portable case allows you to easily and safely move devices between classrooms, sharing the engaging experience with all students.

Curriculum Aligned Lesson Plans

Our structured lesson plans and highly engaging curriculum-aligned resources help spark the imagination of students to greatly improve knowledge retention. With VR and our innovative Augmented Reality Classroom (ARC), there are over 500 experiences available ... and counting!

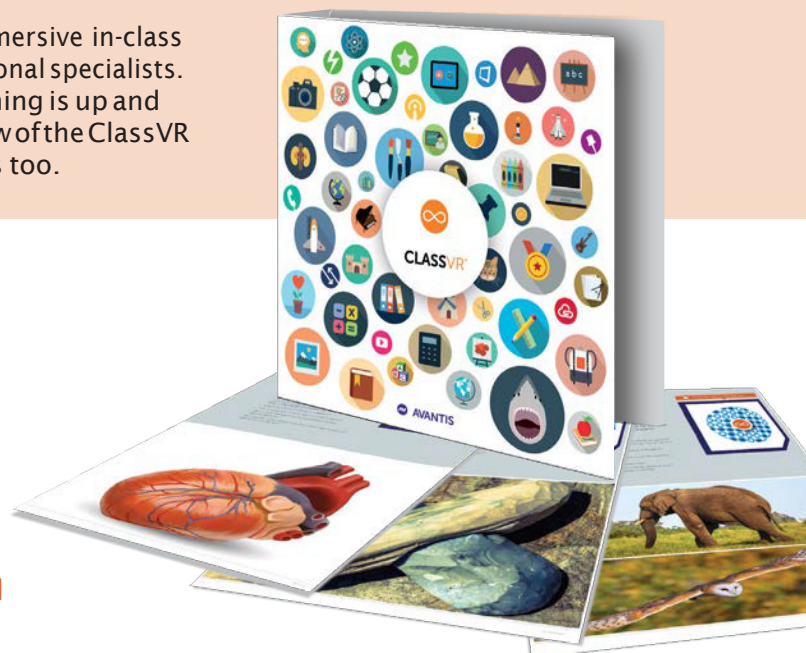

Full Installation, Classroom Experience & CPD

Comprehensive installation and immersive in-class training is available from our educational specialists. Not only will we ensure that everything is up and running, we will give you an overview of the ClassVR portal and some great lesson ideas too.

Mount Lockyer School, WA

"ClassVR really helped the students to get a feel for London in the 1800s and set the scene and interest for the story Oliver Twist. This foundation enabled the students to recall their experiences when it came to their creative writing piece. ClassVR is an amazing stimulus, students have the opportunity to travel to far-away places and have life-like experiences to enrich their writing."

Solutions IT on 08 6241 2550 or sales@solutionsit.com.au

Emmanuel College is a co-educational, multi-denominational school located at Carrara on the Gold Coast. The College offers schooling from Prep through to Year 12 and has approximately 1600 students on campus.

Why ClassVR?

The school researched several VR solutions and ClassVR stood out as the best fit for the school's current needs. "ClassVR was a great solution; we didn't need to create a dedicated VR space to accommodate the technology nor did we need a high-performance machine. It is easily transportable from class to class" Mark explains.

"Affordability was also a factor in our decision making. While we are a well-resourced school, we always aim to use our finances in a way that generates the best value and outcomes in the classroom. We could buy a set of 8 ClassVR

headsets and the Teacher Portal for the same price as one VR headset from some of the other brands. The others didn't have the built in AR features and were not as simple to use. Any staff member, or student, can drive ClassVR and that means there is no additional pressure on our IT support resources. Its useability across the school means that students of all ages can benefit from this solution."

How it has changed the dynamic in the classroom?

"It's easy to see that during a ClassVR lesson there is a high level of engagement and excitement. Students have a different depth of knowledge about what they have been studying - a deeper understanding. For example, we have been exploring solar systems with Year 3 students. The VR experience allows students to stand on the sun and look around the solar system. They gain an understanding of the size of each planet in relation to another and how they span the solar system. Our Year 2 students have been studying people, places and how they connect. They have been comparing markets in Thailand with markets in Jordan and Turkey. They can immerse themselves in the cultural atmosphere, the buildings and the merchandise, and then discuss the similarities and the differences by recalling the experiences.

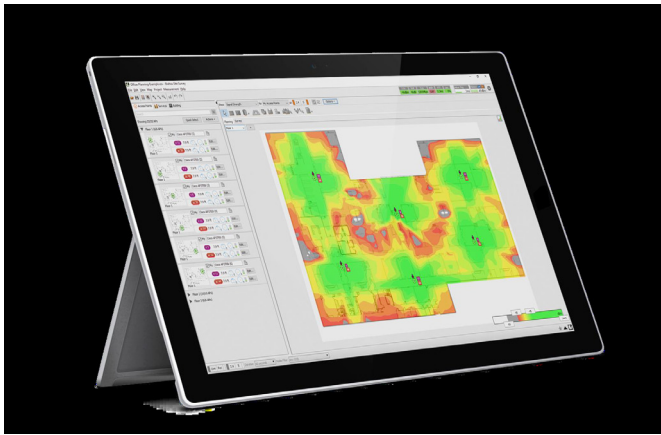

As part of a wider project, some of our older students create content using Microsoft Paint 3D and export it to ClassVR to view and interact with it. They have also exported their Minecraft structures and created mixed-reality cubes to view them.

What benefits have you observed from the introduction of ClassVR?

The school has seen a number of benefits from using ClassVR, "We have an early-years student who has been showing traits similar to selective mutism. He has struggled with his speech and overall confidence in the classroom and rarely speaks. His teacher found the student had difficulties using language to discuss or express his ideas or explain what he was writing about."

As part of a lesson, his teacher used ClassVR to introduce a new topic. "The ease and breadth of language used by the student during the lesson surprised his teacher. He was truly 'experiencing' something new and was excited to talk about it, and the teacher was amazed how articulate and expressive he was discussing his experience. ClassVR is a great tool being used as a writing stimulus for him."... read full story at: <http://immersiviteit.com.au/case-studies/>

Schools these days utilise technology in new and exciting ways. Staff and students are embracing mobile devices and technologies to learn and collaborate. Wireless has become a critical piece of the infrastructure and needs to be reliable, fast and secure.

Solutions IT wireless as a service assists schools in ensuring that schools have the required wireless networking to not only provide coverage but also density or capacity to ensure great end user experience and satisfaction.

Solutions IT provide a range of services including:

Planning and Design

We will utilise cutting edge tools to survey and analyse your current infrastructure to determine:

- ✓ How many wireless access points do you need to provide required coverage and capacity
- ✓ What is the optimal location for your wireless access points
- ✓ Provide spectrum analysis and heat maps to minimise interference and maximise performance of your network
- ✓ What is the optimal device configuration to avoid channel interference
- ✓ How do you keep your users and infrastructure secure

Installation and Configuration

Solutions IT can install and configure your wireless network. Whether it's a single wireless access point or hundreds of wireless access points.

Solutions IT can help with:

- ✓ Supply and Deployment of wireless infrastructure
- ✓ Configuration and channel management
- ✓ Setup and configuration of security
- ✓ High availability networks

Monitoring and Management

Over time changes in the environment, addition of more mobile devices and/or changes with the concentration of devices in one area such as halls and gyms can impact and alter the performance of your network.

Solutions IT can assist with:

- ✓ Monitoring on infrastructure
- ✓ Management and updates to devices to maximise performance and security
- ✓ Audits and reviews of existing infrastructure
- ✓ Warranty and repairs

Protecting your Data

Traditional backup methods are resource heavy and expensive to manage. Solutions IT provides a fast, secure, reliable and more cost-effective solution.

Backup As A Service

Solutions IT gives you the ability to protect your entire IT environment with our cloud-based Backup as a Service solution. Whether you need to protect your physical or virtual environments, we have the right solution to ensure your school's data is always available and secure.

Disaster Recovery as a Service

This allows you to quickly and easily restore services in the cloud in the event of a physical failure of your on premise infrastructure. Partnering with Veeam, Solutions IT gives you the option to replicate your Veeam protected systems to our cloud based data centres using an efficient image-based replication solution.

Archive as a Service

Are you looking for long term storage solution? Our archive solution enables to you to store more, for less. Create your archives directly from your primary cloud storage so there is no extra data to transfer.

Backup for Office365

Our Office365 cloud-to-cloud backup as a service offering provides a simple, automated and secure backup solution that enables complete control and protection of Office365, so you can rest assured that all your data is protected and recoverable at any time.

Benefits of our cloud and DR services

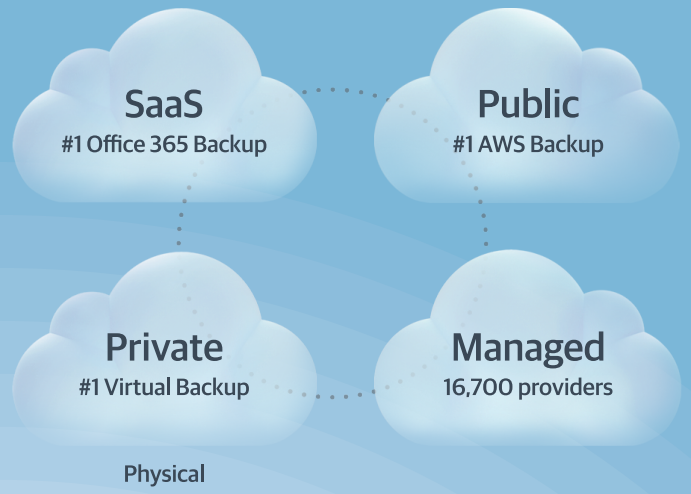

- ✓ Secure offsite backup and storage located in Australia
- ✓ Compliments and extends your existing onsite backup
- ✓ High capacity and fully scalable
- ✓ Cost-Friendly Solution
- ✓ Local data seeding service available
- ✓ Monitoring and alerting available
